

Status report BEAst Supply (Material and NeC)

Elements and structure			
Entity id	Element name	Cardinality	Element specification
Status report			
			Entity name: Status report
			Comment: This business transaction is used to provide an arrival notice.
T6332	Status report number	1..1	Definition: A unique number issued by the supplier that identifies the status report. Length: 0 .. 17 Format: SDDb::String17
T6325	Document date time	1..1	Definition: Date and time when the document was issued Pattern: \d{12} Format: SDDb::DateAndShortTime
T6333	Assignment status	0..1	Definition: A code identifying type of occurrence according to a code list. Length: 0 .. 3 Format: SDDb::Assignment status
Code/Description			
1 Arrived			
13 Collected			
21 Delivered			
24 Departed			
35 Expedited			
72 Receipt acknowledged			
74 Received			
78 Released			
T6342	Event type	0..1	Definition: Type of reason FractionDigits: 0 TotalDigits: 3 TotalDigits: 3 Format: SDDb::Event type
Code/Description			
18 Damaged			
20 Delayed			
88 Consignment split			
106 Refused delivery			
117 Missing			
210 Gods saknas			
211 Business closed			
234 Wrong address			
265 Unknown reason			
294 Refused, too late

Code/Description																															
Z50	Tautliner truck with removable roof																														
Z51	Flat lorry																														
Z52	Tail lift																														
Z53	Flat lorry with crane max 4 m																														
Z54	Flat lorry with crane 4-9 m																														
Z55	Flat lorry with crane more than 9 m																														
Z56	Forklift																														
Z57	Tautliner truck																														
Z58	Short term storage (only to be applied for the specific shipment)																														
Z59	Porterage																														
Z60	Carry-in service																														
Z61	Standard transport																														
Z62	Loaded on truck																														
T6344	Unloading instruction	0..5	Definition: Unloading instruction in clear text. Length: 0 .. 35 Format: SDDb::String35																												
T6345	Vehicle attribute code	0..5	Definition: Code that specifies attribute for the vehicle that will deliver. Length: 0 .. 3 Format: SDDb::Vehicle attribute code <table border="1"> <thead> <tr> <th>Code/Description</th> <th></th> </tr> </thead> <tbody> <tr><td>Z70</td><td>Vehicle maximum height in meter</td></tr> <tr><td>Z71</td><td>Vehicle maximum length in meter</td></tr> </tbody> </table>	Code/Description		Z70	Vehicle maximum height in meter	Z71	Vehicle maximum length in meter																						
Code/Description																															
Z70	Vehicle maximum height in meter																														
Z71	Vehicle maximum length in meter																														

Status report BEAst Supply (Material and NeC)

Elements and structure			
Entity id	Element name	Cardinality	Element specification
			Code/Description
			Z72 Vehicle maximum weight in ton
			Z73 Max axle load
T6346	Attribute value	0..5	Definition: Value for the attribute that is specified in T6345. Length: 0 .. 35 Format: SDDb::String35
	Document references	1..unbounded	Definition: Reference to source document and messages
T6004	Project number	0..1	Definition: Identity number assigned to a project. Comment: Required for manual call off orders. Length: 0 .. 70 Format: SDDb::String70
T6127	Reference for freight forwarders number	0..1	Definition: Reference number to identify a freight. Comment: Not relevant for civil engineering and aggregate materials. Length: 0 .. 70 Format: SDDb::String70
T6335	Call off reference	1..1	Definition: Reference to the call off order of the buyer. Format: XSD Data types::string
T6336	Call off line reference	1..1	Definition: Reference to the call off order line that this line is referring to. Format: XSD Data types::string
T0138	Serial Shipping Container Code	0..unbounded	Definition: Identity for a package expressed as a Serial Shipping Container Code (SSCC) Comment: Not relevant for civil engineering and aggregate materials. Pattern: \d{18} Format: SDDb::SSCC
	Buyer	1..1	Comment: One of T0008 and T6001 must be used.
T0008	Buyer	0..1	Definition: Party formally defined as the buyer in a commercial agreement Comment: Identification with a GLN number. Pattern: \d{13} Format: SDDb::GLN
T6001	Partner Identifier	0..1	Definition: Identification of a party. One of the parties agreed numbers that not is a GLN number Length: 0 .. 35 Format: SDDb::Party Identifier
T5001	Party name	0..1	Definition: Name of company. Length: 0 .. 35 Format: SDDb::Party name

0..1 = no or only one occurrence | 1..1 = occurs exactly once

Choice = only one in the next level of underlying entities/classes occurs

0..unbounded = no or several occurrences | 1.. unbounded = one or several occurrences
